DECKING RANGE CARE GUIDE

POST-DECK BUILD PROTECTION

We recommend taking a few moments to read through this Decking Care Guide before and after installing your WoodEvo deck. Following these simple care and maintenance guidelines helps keep your deck looking its best and ensures your warranty remains valid.

If you're ever unsure about installation, cleaning, or ongoing care, our team is here to help. Please don't hesitate to get in touch with us at info@woodevo.com.au — we're always happy to guide you in the right direction.

RUBBER/PLASTIC MAT ADVISORY

Avoid placing rubber or plastic mats directly on the deck, as plasticisers in these materials can cause staining.

- Welcome mats
- Planters
- BBQ heat protectors

These materials can release chemicals that may cause staining. If this occurs, the stains are repairable—contact info@woodevo.com.au for guidance. Consider using mats made from natural fibres and planters with protective bases instead.

NON-DECKING WORKS

WoodEvo is not responsible for damage caused by foreign substances. Protect your deck by covering it with natural canvas when performing any of the following tasks:

- Painting
- Rendering
- Concrete or tile grouting
- Metal cutting or grinding
- Any work involving materials that could stain, corrode, or dry onto the deck

METAL CUTTING PRECAUTIONS

- Avoid cutting or drilling metal on top of your deck, as hot metal shavings can embed into the boards and cause permanent damage.
- If metal cutting must be done nearby, use a protective cover to catch debris.

TIPS FOR YOUR DECK

DECK CLEANING PROCESS

To maintain the quality of your WoodEvo decking before installation, store boards properly:

- For routine cleaning, use soap and water or a diluted vinegar solution.
- For stubborn stains, a 1:4 mix of white vinegar and water can be used sparingly—test on a small area first.
- Avoid harsh cleaners and solvent-based chemicals as they may damage the surface.

PRESSURE WASHER GUIDELINES

- A pressure washer up to 1400 psi can be used safely.
- Always use a wide spray setting and keep a reasonable distance to avoid damage.
- Do not use a narrow spray setting or hold the washer too close, as this can cause permanent marks.

FURNITURE AND GRILL PLACEMENT

- Use furniture with non-abrasive feet to prevent scratches.
- Place a heat-resistant ceramic or fibre cement barrier under BBQs or grills to protect the deck from heat damage.
- Avoid direct contact between hot items and the deck surface.

TEMPERATURE AND COLOUR AWARENESS

WoodEvo decking is designed to retain less heat than many other materials, but it can still feel warm underfoot, especially in darker shades.

UNDERSTANDING COLOUR AND GRAIN PATTERNS

WoodEvo decking mimics the natural look of timber, meaning each board may have slight variations in color and grain pattern. These variations are intentional and add to the aesthetic appeal of your deck without affecting durability or performance.

By following this Care Guide, you can ensure your WoodEvo deck stays in perfect condition for years to come. Proper installation, protection during construction, and regular maintenance will preserve its beauty and durability, giving you a deck that looks great and performs flawlessly.
